

BLOWETT
INVIGORATE

Triple Acting Bio-Active Turf Solution

*A proven & safe solution
for irrigated premium
turf.*

MAXIMISE WATER CAPTURE

RETAIN SOIL MOISTURE

PROMOTE GREENING

How it Works

BLOWETT Invigorate is an innovative and unique all-purpose soil surfactant containing bio-stimulants to promote plant root growth. BLOWETT Invigorate is the ideal all-round option for all forms of turf and landscaping use to assist in penetration, retention and distribution of moisture and the uptake of nutrients.

BLOWETT Invigorate contains a proprietary blend of surfactants, including a strong surface tension agent for optimizing penetration, as well as a residual polymeric surfactant ensuring reliable rewetting characteristics. When applied following label instructions this product will overcome water repellency, improve water utilisation and stimulate plant vigour, root growth and soil biology in all forms of turf management.

BLOWETT Invigorate provides the best results when applied regularly, & prior to rainfall or irrigation. Avoid application when turf is suffering heat and/or moisture stress.

**Increases water
penetration
in WA's
hydrophobic
soils**

**Increases
water retention
throughout the
soil profile**

Key Features

- » High performance, all-purpose formulation.
- » Bio-stimulant promotes plant vigour, root growth and soil biology.
- » Enhances uptake of plant nutrients.
- » Fast treatment of localised dry patch situations.
- » Can be 'spot' applied to promote greening in high traffic or other challenging areas.
- » Compatible with other tank mix components.
- » Optimal plant safety.
- » Low water rates for application.

**Promotes
greening
through better
root growth &
soil biology**

MADE IN WA FOR WA SOILS

Proudly developed and manufactured in WA specifically for WA soils by the soil treatment experts at SACOA.

SACOA Pty Ltd. 1, 229 Stirling Hwy, Claremont WA 6010

INVIGORATE

MAXIMISE WATER CAPTURE

RETAIN SOIL MOISTURE

PROMOTE GREENING

ESSENTIAL DATA

Active Ingredient

- » Proprietary blend of polyethelyne glycol / ethoxylated alcohol mixture plus bio-active

Pack Sizes

- » 20L, 200L, 1000L

Situation

- » All forms of turf management.

Rates

- » 250-500ml per 100m²
- » 25 – 50L/Ha

Critical Comments

- » Apply in at least 400L water per hectare. Apply prior to rainfall/irrigation to maximise moisture utilisation.
- » Irrigate immediately following application when temperatures are expected to exceed 30°C within 24 hours of application.

Application Timing

- » Apply in early spring to defend against evaporation as soil temperatures rise. Follow up with applications in early summer & autumn.

Mixing

- » Can safely mix & spray with other components.

Safety Notes

- » Safe for use in public spaces.
- » Always read the product label before use.
