DIRECTIONS FOR USE

SITUATION	RATE PER 100M2	RATE L/HA	CRITICAL COMMENTS
Fairway / Open space.	500ml	50L	Apply LURE H2O™ TURF ULTRA in at least 500 - 800L water per hectare. Apply prior to rainfall/irrigation to maximise moisture utilisation. Irrigate immediately following application when temperatures are expected to exceed 30°C within 24 hours of application.
Preparation to Turf Laying or seeding.	250ml	25L	Apply LURE H2O™ TURF ULTRA in at least 250L water per hectare. Apply immediately prior to laying / seeding.

IMPORTANT
NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL, UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

GENERAL INSTRUCTIONS
LURE H2O™ TURF ULTRA has been formulated for all soil types and helps maintain turf quality through periods of dry weather by maximising the effectiveness of rainfall and irrigation water. By capturing and retaining rainfall, **LURE H2O™ TURF ULTRA** provides a moisture bank that improves rapid re-establishment and reduces dry period plant stress. **LURE H2O™ TURF ULTRA** is ideal as a soil applied application prior to the installation of roll-on turf or the implementation of a turf seeding program. When applied following these label instructions, this product will overcome hydrophobia and improve water utilisation in all forms of turf management. To maximise effectiveness use while soil is still wet.

MIXING & COMPATIBILITY
LURE H2O™ TURF ULTRA mixes readily with water. Add the required amount of **LURE H2O™ TURF ULTRA** to the desired amount of water in the spray tank. Gentle mixing will minimise foam generation. A jar test is recommended prior to mixing with other turf products.

APPLICATION
 Apply **LURE H2O™ TURF ULTRA** in August and April. For best results, water the area to be treated prior to and after application. Water in well immediately after application otherwise there could be a risk of turf discoloration if product remains on the leaf surface.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT
 DO NOT contaminate streams, rivers, or waterways with the chemicals or used containers. A strategy to minimise spray drift should always be employed when applying spray within 50m of aquatic environments.

STORAGE AND DISPOSAL
 Store away from oxidising agents. Keep container securely closed when not in use. Store in the closed original container in a cool, well-ventilated area. Do not store for prolonged periods in direct sunlight. Triple or preferably pressure rinse containers before disposal. In accordance with local law.

SAFETY DIRECTIONS
 Avoid eye and repeated or prolonged skin contact and inhalation of mist. Wear gloves and safety glasses. Use only in well ventilated areas. If inhalation risk exists wear organic vapour/particle respirator.

For Fire: Use water fog, foam, dry agent. Avoid breathing products of combustion.

For Spills: Slippery when spilt. Wear protective equipment. Absorb with sand or soil.

MATERIAL SAFETY DATA SHEET
 Additional information is listed in the Material Safety Data Sheet (MSDS). These are available on the SACOA website www.sacoa.com.au

REFILLABLE CONTAINERS
 For 1000L containers empty contents fully into application equipment. Close all valves and return to point of supply for refilling or storage. All containers remain the property of SACOA Pty Ltd.

NOTICE TO BUYER
 SACOA Pty Ltd accepts no responsibility for any consequence whatsoever arising from the use of the product other than in accordance with this label.
