

READ SAFETY DIRECTIONS BEFORE OPENING OR USING

AQUAFORCE

ACTIVE CONSTITUENT: 100% SPECIALITY NON-IONIC SURFACTANT

**PREMIUM SOIL WETTING AGENT
HIGHLY PENETRATING HEAVY DUTY
WETTING AGENT FOR PROFESSIONAL USE**

DRAMATICALLY IMPROVES WATER PENETRATION
AND HELPS PREVENT DRY PATCH IN TURF AND LAWNS

20 LITRES

DIRECTIONS FOR USE

Situation	Application Rate	Critical comments
Turf Management PREMIUM PROGRAM All situations	25 L/Ha	Apply in early cool hours of the day and water in well. Apply in at least 1000 - 1250 L/Ha of water carrier Apply at 8 weekly intervals or as required.
LONG LASTING PROGRAM Golf Greens & Tees Fairways Bowling Greens Grass Tennis Courts	50 L/Ha 2L/400 sq. Mtr 15-25 L/Ha 7 Litres 1.5 Litres	Apply at 12 -14 weekly intervals or as required. Apply in at least 2000 - 2500 L/Ha water carrier. Water in well immediately after application. Do not leave on the leaf for prolonged periods
Early application of AQUAFORCE in mid spring with a follow up treatment in mid summer will usually provide good protection from dry patch and water repellency. Spot treatments with a hand gun can be used to treat problem spots if they occur.		
Domestic Gardens Lawns and Flower beds	15ml / 10L	15ml in a 10L watering can treats 3 square metres. Water in well.
Horticulture General use.	1.5L/ 1000L	Applying AQUAFORCE to water repellent soils around the base of the plant or tree to achieve good wet coverage. Water in well after application.

NOT TO BE USED FOR ANY PURPOSE OTHER THAN INDICATED ON THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION

GENERAL INSTRUCTIONS

AQUAFORCE is highly penetrating non-ionic surfactant suitable for use in most situations where repellency inhibits or prevents the growth of turf, gardens and crops. If left untreated poor water penetration leads to weak root growth, poor nutrient uptake and low crop yields or death of sensitive plants and turf.

AQUAFORCE provides rapid penetration of water to highly water repellent soils and continues to achieve deep and lateral penetration even as it dilutes while watering in.

AQUAFORCE is very long lasting and in some situations will continue to function for 12 months.

Use with herbicides and fertilisers in turf is not recommended as it may increase the phytotoxicity of those chemicals. It is a wise precaution to test all mixtures before committing to large scale use. As it is highly penetrating, Aquaforce must be applied with adequate amounts of water, and must be washed off the leaf into the soil immediately after application otherwise there is a risk of turf discolouration.

MIXING

AQUAFORCE mixes easily with water and should be added directly to the spray tank after the loading of water. Gentle mixing will minimise foam generation.

STORAGE AND DISPOSAL

Keep out of reach of children.
Store in closed, original container in a well ventilated area, as cool as possible. Triple rinse empty containers and add rinsings to tank. Destroy empty containers by crushing or puncturing them. Bury containers at an approved landfill or bury under at least 500mm of soil at an authorised disposal site.

SAFETY DIRECTIONS

Avoid contact with skin or eyes. Wear rubber gloves, overalls and goggles or face shield.

FIRST AID

If poisoning occurs induce vomiting and contact a doctor or Poisons Information Centre (TEL 131123). If skin contact occurs remove contaminated clothing and wash skin thoroughly. If in eyes, hold eyes open and flood with water for at least 15 minutes and see a doctor.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND THE ENVIRONMENT

Do not contaminate streams, rivers or waterways with the chemical or used containers.

CONDITIONS OF SALE

The use of AQUAFORCE being beyond the control of SST Australia Pty Ltd, no warranty expressed or implied is given by SST Australia Ltd. regarding its suitability, fitness or efficiency for any purpose for which it is used by the buyer, whether in accordance with the directions or not and SST Australia Pty Ltd. accepts no responsibility for any consequences whatsoever resulting from the use of this product.
