GENERAL INSTRUCTIONS

Trilogy is a low foaming non-ionic surfactant suitable for use with Glyphosate herbicides. It improves the efficiency of Glyphosate herbicides to control Annual Ryegrass, Silvergrass and Perennial grasses (typically from beginning August to end October). Trilogy is not a general purpose surfactant and should only be used where a wetting agent is recommended, for this purpose.

MIXING

Add Trilogy to spray tank after agricultural chemical is thoroughly mixed.

PROTECTION OF WILDLIFE, FISH, CRUSTACEA AND ENVIRONMENT

DO NOT contaminate streams, rivers or waterways with the chemical or used container.

STORAGE AND DISPOSAL

Keep out of reach of children.

Store in closed, original container in a cool, well ventilated area. Do not store for prolonged periods in direct sunlight. Triple or, preferably, pressure rinse containers before disposal. Add rinsings to spray tank or knapsack mix. Do not dispose of undiluted chemicals on-site. If recycling, replace cap and return clean containers to recycler or designated collection point. If not recycling, break, crush or puncture and bury empty containers in a local authority landfill. If no landfill is available, bury the containers below 500mm in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots. Empty containers and product should not be burnt.
